

INTENSE CERTIFIED SCRUMMASTER®

This is the foundation course for everyone who will be working in a Scrum environment. Current and future ScrumMasters learn the essentials of Scrum and the fundamentals of creating high performance teams. Project Managers start their transition to the Agile approach. Software Developers complete the first steps in their 5 day CSD Certified Scrum Developer certification.

Scrum is a simple team-based framework for solving complex problems (like software development). This course teaches you the mindset and the practices to make a simple vision into reality: That this project can be your best, most successful project ever!

THE FACTS

Topics:

- Scrum Principles and Values
- Scrum Roles – Product Owner, Scrum Master, Development Team
- Scrum Meetings, Sprint Planning & Review, Daily Scrum, Retrospective
- Scrum Artefacts – Product Backlog, Sprint Backlog, Product Increment
- Significance of “Definition of Done”
- User Stories and Acceptance Criteria
- Release Estimating and Planning with Story Points
- Hands-on experience doing Scrum

Day 1 – Scrum Values and Principles:

- What makes an ideal project?
- What is Scrum in 25 words or less?
- Why is Scrum so different than traditional project management?
- How and why does Scrum work?
- What does it feel like to be in a Scrum Project?
- How do you really do Scrum?
- Why is focus essential to performance and success?

Duration:

- 2 Days

Language:

- This course is offered in English on request or German if all participants agree.

Prerequisites:

- No special prerequisites. Familiarity with IT and/or Software Development Projects is helpful. All participants are expected to read a 10 page excerpt of “Do Better Scrum” by Peter Hundermark.

Interactive:

- You get an intense, personal training with much opportunity to work with the trainer and in small groups.

Certification:

- All participants who actively participate in the entire course receive a confirmation of participation and qualify for Certification as a [ScrumMaster®](#) by the [Scrum Alliance®](#). An additional test is required (which you can take from home on the web). The test fee and membership in the Scrum Alliance are included in your course costs.

Day 2 – Scrum Core Practices and other Well Known Agile Practices

- What are the roles in Scrum and how to they relate to established job functions?
- What do managers do in a Scrum organization?
- How do you specify and estimate work?
- How do you plan and monitor a release? How do you hit a deadline?
- How do you improve team performance with Scrum?
- How do you handle big, distributed projects in Scrum? (Scaling)
- How do you get started with Scrum? Sprint Zero and your first sprint.

PDU:

Members of the PMI can claim 15 PDUs for successful completion of this course and apply this course towards meeting the requirement of the ACP.

Partner:

These trainings are held by Peter Stevens of the [Saat Network](#):
